Image Use for School Website

Dear Parents

As part of the ongoing website development, we are looking to add more content to the site. We have previously worked on the precedent that any images uploaded to the website would be of children's work and not of the children.

We are looking to use the website as a means of promoting the school and, it is our belief, that to truly do so we would benefit from being able to include pictures of the people who make this school such a fantastic place - the children.

Children's names would not appear next to any uploaded images.

In order to do so, we ask for your consent. Of course, you are not obliged to sign and or agree although we would appreciate a returned form either way.

If you have any further queries before you return the form, please contact me.

Many thanks

Mr Richard Pearson

I give/decline permission allowing my child's photo to be uploaded to the school website. I understand that my child's name will not appear next to any uploaded photographic image. I understand that photographs may remain in the website archive after my child leaves the school.

Child/Children's name(s):
